

WOOD DUST EXTRACTION

OVERVIEW

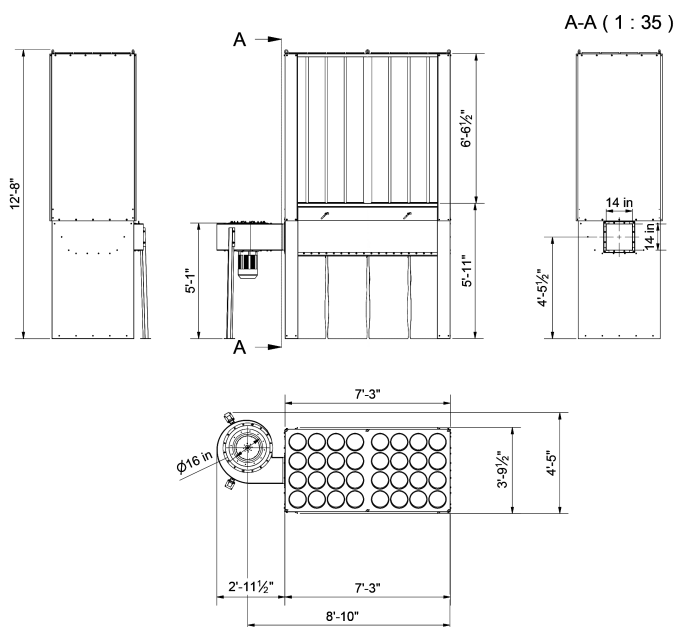

The Coral FM10 READY modular filter unit is an economically priced and practical solution for the extraction of wood dust. The FM10 READY features a large filter surface area which allows the dust collection system to run for long periods of time before maintenance is required.

- + Specifically designed for the USA Market, with **UL Certified** motor, switch and filters.
- + **Improved Filtering Efficiency**, thanks to the large number of polyester felt filter sleeves.
- + Created to keep the **overall dimensions small** in relation to the filtering surface.
- + Delivered pre-assembled, **ready for operation** in just a few steps.

FM10 READY

UL Certified modular filter unit
for wood dust applications
