

Depureco TB Series Continuous Duty Vacuums

Small in Size... Big in Power!

The Depureco TB Series line of continuous-duty vacuums are the most compact and powerful vacuums available on the market today. These units are available in single or 3-phase and are designed to run continuously without overheating. The direct drive blower, large teflon coated filter, manual filter shaker and on board hose and tool carrier make the TB series the right choice for many industrial cleanup applications.

TB Features:

- *3450 RPM direct driven blowers (no belts) which need no maintenance
- *Long life dependable Siemens regenerative high performance blowers
- *Teflon coated filter bag 99% efficiency @ .5 microns with manual filter shaker
- *Vacuum relief valves to protect the blower from overheating
- *Quick release waste bin on wheels means no mess and nothing to carry
- *Heavy duty powder coated steel construction on baghouse and dirt can
- *Built-in hose and tool carrier
- *Vacuum gauge
- *IP65/Nema 4 switch pre-wired with cord and no plug
- *Fully anti-static grounded design
- *2" Inlet with material deflector and locking wheel
- *Zone 22 ATEX compliant
